# PREMIUM CITY DIRECTORY REPORT

Property Archives' Premium City Directory Report exceeds the ASTM E1527-21 standard and provides the most comprehensive coverage in the industry by including a search of Property Archives' proprietary database of over two billion commercial and residential records, business names and occupant records for every city and town in the United States, at approximate five-year intervals, from recent years back to 1993 for the street and address ranges for the subject and adjoining properties.

Further investigation is performed by Property Archives' professional research staff in national repositories, including the Library of Congress and the Allen County Public Library. Coverage is researched in city directories, cross directories and street address directories in hardcopy or microfilm format.

Abstracts of the information from the directories are provided and where possible, images from directories in the public domain, are included in the final report.

Please contact us at [orders@propertyarchives.net](mailto:orders@propertyarchives.net) with any questions.
